

Foam Extinguishing Systems

PRODUCTS USED IN FOAM SYSTEM APPLICATIONS

- Mobile foam applicators
- Fixed foam applicators
- Foam cabinets
- Mobile foam proportioners
- Horizontal and vertical bladder tanks
- Bladder tank type proportioners
- Hydraulic concentration valves
- Foam pumps
- Pump type proportioners
- Inline foam ratios
- Foam cells (foam chamber)
- Foam makers
- Foam generators
- Foam nozzles
- Water and foam monitors
- Monitors for mobile use
- Fixed type monitors
- Self-oscillating monitors
- Hydraulic control monitors
- Remote controlled monitors
- Compressed air foam (CAFS) units

FOAM USAGE AREAS

Foam extinguishing systems, which are widely used, are generally used in airplane and hicopter hangars, in storage, at stations where fuels are loaded or unloaded, in paint production facilities, in chemical producing or storing facilities, in storage areas of flammable and combustibile liquids, Shipyards, berths, oil refineries, yacht harbors and similar areas. Due to its ability to handle immediate intervention and rapid control, It acts in a short time on the flammable surface and avoids possible major fires.
